

Salus

Health & safety that stays
audit-ready.

One platform for South African workplaces to run
HSE, close actions, and keep evidence in one place
— ready for inspectors, clients, and insurers.

WHY SALUS

Built for how HSE actually runs

Salus is a multi-company Health & Safety Management System. Replace scattered spreadsheets and paper packs with live registers, ownership, signatures, and branded PDFs your SHE team can defend.

One system, every site	Built for SA HSE	Close the loop
Inspections, incidents, PPE, visitors, permits, and appointments in one workspace.	OHSA-aligned appointments, SHE structures, legal registers, and audit evidence.	Capture work, collect WhatsApp e-signatures, export PDFs, and track reviews.

INSIDE THE PLATFORM

Everything your safety file needs

Health & Safety	Training & gap analysis, medicals, PPE stock/issue with e-sign, SHE committee elections & meetings, rule-based risk assessments, hazardous chemicals with SDS, emergency drills.
Compliance	SA legal registers, 277-item HSE audit checklist, formal legal appointments (Section 16, SHE reps), daily/weekly/monthly inspections with NCRs, incident investigation & cost analysis.
Site Safety	Toolbox talks with attendee signatures, induction training, visitor check-in, and permit to work for hot work, height, confined space, and related tasks.
Contractors & Docs	Contractor safety-file portal with token uploads and scored compliance, plus a structured document library for procedures, certificates, and company files.

HOW IT WORKS

Live in three clear steps

01

Register your company

Create a secure company space, invite users, and control module access per person.

02

Run the day-to-day

Log inspections, incidents, PPE, visitors, permits, and appointments from one dashboard.

03

Prove compliance

Send WhatsApp signature links, download branded PDFs, and track reviews before they fall overdue.

WHAT STANDS OUT

Details that win the deal

- **Multi-company tenancy** — each company keeps its own data, branding, and user access.
- **WhatsApp e-signatures** — appointments, incidents, PPE issues, and toolbox talks signed remotely.
- **Branded PDF exports** — company logo and name on the records auditors and clients expect.
- **Rule-based risk drafts** — Salus builds assessment drafts from built-in HSE templates.
- **Contractor portal** — share a secure upload link and score safety-file completeness.

Show Salus. Leave the brochure behind.

Use the live brochure page for walkthroughs, then share this PDF with SHE committees and management. Sign in or register a company from your Salus login page.
