

Salus

Health & safety that stays
audit-ready.

One platform for workplaces anywhere to run HSE,
close actions, and keep evidence ready for inspectors,
clients, and insurers.

WHY SALUS

Built for how HSE actually runs

Salus is a multi-company Health & Safety Management System from Delano Solutions. It replaces scattered spreadsheets and paper packs with live registers, ownership, WhatsApp e-signatures, and branded PDFs — so compliance is operated daily, not reconstructed under pressure.

One system, every site

Inspections, incidents, PPE, visitors, permits, appointments, and contractors in one workspace.

Built for real HSE work

Structured for day-to-day operations — not just document storage.

Close the loop

Capture work, collect signatures, export PDFs, and track reviews to completion.

WHO IT HELPS

Made for the people who carry HSE

Operations & site managers

Run inspections, permits, visitors, and toolbox talks without losing paperwork between shifts.

SHE / HSE officers

Keep appointments, medicals, training, chemicals, and audit evidence current in one place.

Directors & owners

See compliance posture across modules and hand over clean PDFs when asked.

INSIDE THE PLATFORM

Everything your safety file needs

Health & Safety

Keep people competent and protected — then prove it.

- Training certificates, expiry tracking, gap analysis
- Occupational medicals and compliance reporting
- PPE stock, size lists, issue register, e-sign
- Safety committee elections, meetings, actions
- Rule-based risk assessments from HSE templates
- Hazardous chemicals + SDS uploads
- Emergency drill logging

Compliance

Turn obligations into live registers your team can work from.

- Legal registers and legislation references
- 277-item HSE audit checklist with evidence
- Formal H&S appointments with dual e-sign
- Daily / weekly / monthly inspections
- Non-conformance reports
- Incident investigation and cost analysis

Site Safety

Control who is on site and what high-risk work is allowed.

- Toolbox talks with attendee signatures
- Induction training and expiry tracking
- Visitor register with host and purpose
- Permit to work (hot work, height, confined space)
- Maintenance schedules for plant and vehicles

Contractor Management

Hold contractors to the same compliance standard.

- Safety-file portal with secure upload links
 - Scored compliance across OHS sections
 - Document library for procedures and certificates
 - Clear view of who is current — and who is not
-

HOW IT WORKS

Live in three clear steps

01

Register your company

Create a secure workspace, invite users, set roles, and control module access.

02

Run the day-to-day

Log inspections, incidents, PPE, visitors, permits, appointments, and contractor files.

03

Prove compliance

Send WhatsApp signature links, download branded PDFs, and track reviews before they fall overdue.

WHAT STANDS OUT

Details that win the deal

- **Multi-company tenancy** — each company keeps its own data, logo, brand colour, and user access.
- **Module-level access control** — admins decide exactly which modules each user can open.
- **WhatsApp e-signatures** — appointments, incidents, PPE issues, and toolbox talks signed remotely.
- **Branded PDF exports** — company name and logo on the records auditors and clients expect.
- **Rule-based risk drafts** — Salus builds assessment drafts from built-in HSE templates.
- **Contractor portal** — share a secure upload link and score safety-file completeness.
- **Works in any country** — configure structure, appointments, registers, and documents for local HSE requirements.

Show Salus. Leave the brochure behind.

Use the live brochure page for walkthroughs, then share this PDF with safety committees and management. Open Brochure from your Salus login page, or register a company to get started.
